

## Introduction to the 200FD Fan Circulated Oven

200FD Fan Circulated Oven is ideal for heating materials prior to dip coating, dome blowing, press forming and thermoforming. It is also suitable for pre-drying materials prior to vacuum forming. All ovens are capable of heating materials up to 350°C, and are fitted with digital temperature controllers and high quality insulation for optimum energy efficiency. Stands are available for the 200FD.

## Machine Dimensions (mm)

## Specifications

Voltage 230V 50-60Hz  
Max Current 13 Amps

Internal Capacity 508 x 355 x 304mm  
Insulation 50mm  
Maximum Operating Temperature 350 °C

Dimensions (Packed) 93 x 63 x 67cm

Weight (Bare Machine) 50kg  
Weight (Packed) 50kg
